PROGRAMMER

Being a developer, my passion lies in developing applications which are functional, user-centric as well as aesthetically pleasing. I love the creative process of implementing ideas whether it is on the front end or back end, creating fast loading, usable and uncomplicated designs. Standards compliant coding is particularly important for me as I write tidy code, pay a lot of attention to mobile friendly layouts, and I really love making things move with animations. I am also a forward thinker as I believe in development to a point where I can easily incorporate new skills in my works.

KEY COMPETENCIES

Web Development	Object-Oriented Programming	Frontend Frameworks
Backend Development	Version Control with Git	Team Collaboration
Problem Solving	Database Management	Code Testing and Debugging

PROFESSIONAL EXPERIENCE

FJR IT SOLUTIONS

May 2021 - June 2021

Computer Servicing Intern

Provided PC services, such as hardware installation, software setup, and maintenance. This hands-on experience greatly enhanced my technical skills and deepened my understanding of IT solutions. I also installed point-to-point (P2P) WiFi connections, ensuring network setups were correctly implemented for home and small business use.

FJR IT SOLUTIONS

April 2022 - November 2023

Point to Point Wifi Installer

I have engineered dependable Point-to-Point Wireless Links with the use of a Mimosa with a directional antenna for long distances. After ensuring the alignment of the radio antennas, and integrating a Radius server, I am also in a position to offer controlled access to a wireless network with strong signal coverage.

Philippine Statistics Authority

July 2020 - Jan 2022

Field Enumerator / Statistical Researcher

I was tasked with collecting demographic, social, and economic data from households. This data is critical for national planning, development programs, and the formulation of policies aimed at improving the quality of life for Filipinos. My role involved identifying and addressing discrepancies in the data.
